Induction Heat Treatment Services Ltd

We would like to introduce our company Induction Heat Treatment Services Ltd.

We are an independent sub contract Heat Treatment organisation that can offer the following services:-

▶ Ageing

▶ Annealing

▶ Carbonitriding

▶ Carburising

▶ Hardening

▶ Homogenising

▶ Induction Annealing

▶ Induction Hardening

▶ Normalising

▶ Shot Blasting

▶ Stress Relieving

▶ Tempering

Where relevant to the following steels;-

Alloy Steels, Carbon Steels, Cast Irons, Stainless Steels, Tool Steels and Die Steels.

We have a selection of vertical controlled / protective gas atmosphere furnaces and both vertical and rectangular tempering furnaces.

Our group of companies celebrated their 100th Anniversary in 2002 by ensuring we maintained our existing customer base and striving to find new customers to ensure our continuing growth in the future.

We would like to take this opportunity in asking you to contact us if you have a requirement for any of the above services currently or in the future to enable us to visit yourselves and discuss your requirements.

Our objective is to remain a competitive, successful and respected provider of heat treatment and furnace services through the utilisation of the latest technology, equipment and our commitment to long term partnerships with customers.

We look forward to providing your heat treatment requirements.

Contact us  Dunrobin Road, Airdrie, ML6 8LS, Scotland
